

## Maximize material handling systems performance with Life Cycle Services (LCS) from Kuecker Logistics Group.

With our manufacturing expertise, we provide comprehensive technical services to see your handling systems through years of use, including:

- 24/7 customer service & remote technical support
- Review & recommendations for existing systems covering maintenance, repair, & modernization
- Life cycle planning for older systems - no matter the original manufacturer or integrator
- Repair, refurbishment, or retrofitting of equipment & hardware
- Preventative maintenance conducted by skilled engineers, ad-hoc or contract
- Procurement & storage for OEM spare & replacement parts
- Employee training & hands-on procedural assistance

Life Cycle Services for Integrated Material Handling Systems

- Maximize Performance of Existing Material Handling Systems for Years to Come
- Receive On-going Technical Support for Equipment & Hardware
- Order & Store OEM Parts With Ease
- Achieve Operational Objectives Cost-Effectively

**Kuecker Logistics Group**

## Aging material handling infrastructure doesn't have to grow obsolete or undergo a costly whole-system revamp.

Our expert LCS support team can assess current systems and operational needs, then provide a plan to improve performance, including:

- Analysis of equipment & software components
- Schedule of recommended maintenance
- List of necessary repairs & suggested spare parts
- Software, controls, & computer hardware update & migration plan to prevent technology obsolescence
- Suggested modernizations
- Strategies for increasing system capacity, utilization, & uptime
- Comparative summaries showing system health
- Detailed assessment report with photographic support & maintenance estimates
- Annual assessments to evaluate current, short-range, & long-range needs

Long-range planning for your material handling system will minimize unforeseen costs and downtime.

## Full-Scale Technical Support

### Field Service

Our extensive technician network ensures that support isn't far away no matter your location. Enjoy these benefits:

- Remote & on-site support
- Emergency troubleshooting & repairs
- Maintenance consultations
- On-call support during peak operations

### Technology Repair

LCS technicians aren't just equipment experts; they're trained to repair material handling systems technology, such as:

- PC-based controllers
- Control system servers for sortation equipment & conveyors
- Order interface boards
- Fulfillment controllers
- Integrated sort devices & cartridges

We can also fabricate custom cables for replacing obsolete components or retrofitting older systems. With our diagnostic services, you'll receive an up-front repair quote at no cost.

## Preventative Maintenance

Invest in preventative maintenance to maximize your handling system's uptime and minimize need for costly emergency repairs.

Our services are performed by skilled systems technicians familiar with handling equipment of any age or manufacturer and available on as-needed or contract basis.

### Spare Parts

In addition to assessing aging material handling systems, we provide easy procurement of OEM spare parts for repairing, replacing, and upgrading equipment. Our knowledgeable specialists can connect you with the materials you need to ensure smooth operations for years to come.

### Obsolescence Planning

Our parts specialists can handle all aspects of obsolescence planning in regard to parts procurement, including:

- Creating a plan detailing a schedule of needed replacement parts
- Identifying necessary replacement parts before they are unavailable or discontinued

### Spare Parts Storage Solutions

You may want to have certain spare parts on hand to address repair or replacement needs immediately. Or if you are abiding by a replacement schedule designed by our skilled LCS team, you may amass a collection of spare parts for which you need a smart storage solution.

We offer a range of custom spare parts storage solutions, including modular drawers and more. We can work to design a system that meets your needs and specifications.

### Training

LCS specialists can address all your material handling systems training needs, including operational and maintenance instruction, improving the efficiency and safety of your systems. This can include:

- Training programs on safety, operations, and maintenance
- In-depth courses on troubleshooting specifics
- Easy-to-follow educational & product manuals with illustration & documentation
- Print & electronically-formatted training materials
- Remote or on-site training capabilities with hands-on components
- Customized training courses to fit your needs

### Parts Brands

Source spare parts from leading brands, including:

- AmbaFlex
- System Logistics
- Automotion Wynparts
- Intelligrated
- Hytrol
- Rockwell Automation
- Allen-Bradley
- Bilt Industries, Inc.
- Gates
- Leeson
- Grove Gear
- Dematic
- Baldor
- Titan Conveyors
- Baldor Dodge
- Ryson
