

KLG Newsletter – 2nd Quarter 2009

KLG Celebrates Grand Opening of New Headquarters Open House a Smashing Success!!

Kuecker Logistics Group celebrated the grand opening of its new corporate headquarters on May 7th. The weather cooperated all day while over two-hundred customers, partners, neighbors, friends and family came to participate in a full day of activities. Our new 42,500 square foot home in Belton, MO was thriving as many of our customers and vendors showed up to attend the ribbon-cutting ceremony along with the Chamber of Commerce and the Mayor of Belton. As you can imagine, it was a little emotional as the Kuecker family was able to officially realize a life long dream after 28 years of hard work and commitment! Shortly after the ceremony, lunch was served. Gourmet Beef Tenderloin sliders with an array of delicious sides helped springboard the day from great to out of this world! But it wasn't all just fun and games at KLG...there was an education to be had. Our friends from Johnson Stephens Consulting hosted two educational sessions that drew capacity crowds. The feedback that we received on the two sessions, "Implementing 21st century labor Mgmt Systems" and "Distribution Engineering '09 - Paybacks in a tough economy", was phenomenal. Everyone that attended found the sessions very worthwhile and informative.

After our educational sessions, it seemed like everyone's attention turned to Happy Hour **and** our state of the art Technology Area. You may remember our last newsletter introducing the Technology Center and Test Loop. The center is now up and running and serves as a fantastic demonstration of the latest in Material Handling Technology.

We would like to thank everyone who attended. We really appreciate your taking part in our celebration. If you were unable to attend, just give us a call and we will set up a tour for you...we can even try to rustle up some lunch for you while you are here!

Wise Moves to Weather a Tough Economy...

Check out KLG's inventory of Used Equipment

KLG is widely known as one of the nation's premier integrators of large system material handling solutions. However, did you know that KLG has a substantial inventory of used equipment and solutions to choose from? From conveyor and carousels to rack and shelving, KLG inventories a wide variety of used and like-new equipment. For detailed information, please visit our web-site or give us a call. In the meantime, here is a small list of some of our items available immediately:

*Full Case Pick Module (Unarco) *Rhino Track carton flow *FKI Brake Meter Belts

*Diamond Phoenix Carousels *Powered Conveyor *Rack & Shelving

KLG is an authorized Westinghouse lighting provider

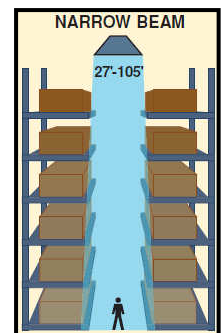

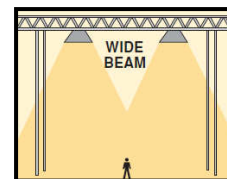

Save 50-75% on your electric bill and have a brighter warehouse

KLG, as part of its complete array of products geared toward making warehouses and distribution centers more efficient, carries lighting alternatives designed to save money, improve safety and help companies with their green initiatives. (Remember, T-12 ballasts are no longer being manufactured and when the supply runs out, they are gone forever) In many scenarios, **the savings on monthly electric bills has been up to 75%**. With federal tax incentives, utility company rebates and the savings on monthly electric bills, many of our customers are seeing ROIs in the 12 to 18 month range. When you factor in that you will have to replace your T-12 lighting at some point anyway, the decision is really pretty easy to make. **Westinghouse's patented reflector technology** is what sets them apart from all other lighting manufacturers, giving you the absolute best savings of any lighting company out there! See how below...

*In Narrow Racked Aisles, (9ft width or less) you can replace a 400W Metal Halide (465 System Watts) with a 2 lamp T5HO Fixture (117 Watts) for up to 75% in Energy Savings

*For Wider Aisles, (10ft+ width) you can replace a 400W Metal Halide (465 System Watts) with a 3 lamp T5HO fixture (176 Watts) for 65% in energy savings

Kuecker Logistics Group is a Systems Integrator providing a wide array of material handling solutions including design, sales, integration and post-sale support. Offerings include equipment and extend to comprehensive integrated systems with warehouse management and warehouse control systems. Please Visit www.kuecker.com
